\$12B+

Enterprises trust MDSL to manage over \$12 billion in global technology spend.

Mobile Devices Under Management

1.8M+

And growing. MDSL's MMS offerings continue to expand globally.

CENTRALIZE MOBILITY MANAGEMENT.

Inventory, usage, and expenses - all in one tool.

Mobile devices are critical for keeping on-the-move employees connected with customers and colleagues but presents a number of challenges for large organizations. Device procurement, deployment, usage analysis, support, data protection, and cost reduction are constant challenges in a rapidly evolving mobile landscape. MDSL's MMS solutions ensure your workforce have the tools to stay connected, supported and productive - wherever your business takes them.

EXPENSE MANAGEMENT AND COST AVOIDANCE.

The average organization can expect to save between 5%-35% of its annual mobile expenses by centrally managing their environment, automating the employee onboarding/offboarding experience, and optimizing device usage. With mobile program costs continuing to grow at an exponential rate, it's more important than ever to have a comprehensive, integrated managed mobility solution.

MDSL provides the dedicated resources to transfer your non-core business activities to our solution experts. Our managed services teams allow you to focus on your core business while offloading the menial, time consuming tasks in managing your enterprise mobility environment.

FULLY INTEGRATED SOLUTION SET.

The MDSL platform provides solutions for organizations interested in managing the full lifecycle of telecom, mobility, cloud, and the internet of things (IoT) through our integrated software platform and industry-leading services.

Your environment is unique. Your security requirements, IT and other human resources, existing systems, and budget all affect which MDSL delivery option is right for your organization. We consult with your teams to determine the right choice because your goals are the same as ours. We want your solution to be quickly implemented, adopted, and fully utilized within the enterprise to generate benefits as soon as possible and embrace the solution over the long term.

 **USAGE REPORTING AND ANALYSIS**

 **AUTOMATED PROCUREMENT AND EBONDING**

 **CENTRALIZED APPROVALS AND AUTOMATED COST ALLOCATION**

“ We’ve reduced our 35 monthly invoices to three in our first 18 months, allowing us to simplify processes and gain visibility within a central platform into each individual user’s asset and usage.”

FACILITY SERVICES ORGANIZATION

“ We did an audit across all of our European estate whereby we thought we had 7,000 mobile devices, but as a result of the audit that MDSL did for us we found we had over 9,000.”
