Mobile Devices Under Management

**1.8M+**

And growing. MDSL's MMS offerings continue to expand globally.

### GAIN INSIGHT. REDUCE COSTS.

Centrally optimize enterprise technology expenses.

MDSL's Technology Expense Management (TEM) Solution gives organizations the ability to manage their telecom, mobility, and IT inventory across vendors, accounts, and locations, while validating expenses in an automated fashion. Invoices are tracked through each stage in the lifecycle for easy retrieval while automated allocations and centralized email approvals reduce processing times and eliminate late fees. After validation against contracted rates and proper approvals are received, interfaces between financial systems provide seamless communication between multiple business units within the organization.

MDSL provides a variety of managed services to transfer non-core activities in managing and optimizing expenses to our MDSL experts. Our teams allow you to focus on your core business while offloading the menial, time consuming tasks in managing the billing process to ensure your bills are paid on time and allocated appropriately within the enterprise.

### CERTIFICATION AND COMPLIANCE.

Engaging with a vendor that is compliant across security, availability, and financial controls is critical for your business. MDSL holds core values in protecting our clients data and processes and are compliant across a variety of areas, including SOC 1/2, GDPR, ISO 270001:2013, and US-EU Privacy Shield.

# FULLY INTEGRATED SOLUTION SET.

The MDSL platform provides solutions for organizations interested in managing the full lifecycle of telecom, mobility, cloud, and the internet of things (IoT) through our integrated software platform and industry-leading services.

Your environment is unique. Your security requirements, IT and other human resources, existing systems, and budget all affect which MDSL delivery option is right for your organization. We consult with your teams to determine the right choice because your goals are the same as ours. We want your solution to be quickly implemented, adopted, and fully utilized within the enterprise to generate benefits as soon as possible and embrace the solution over the long term.

# BUSINESS INTELLIGENCE.

No matter where your pain point lies within your technology infrastructure, MDSL has a solution that will not only help you manage it, but will bring visibility into how it is managed through configurable data views and dashboards. MDSL solutions use robust drag-and-drop reporting capabilities to visualize your data with endless possibilities, providing powerful analytics to make informed decisions for your future.

Dashboards can be fully white-labeled to fit your organization's brand guidelines so admins can share read-only versions of your dashboards within your organization, restricting information based on role-based access to the application.

**TELECOM EXPENSE MANAGEMENT (TEM)**

**MANAGED MOBILITY SERVICES (MMS)**

**CLOUD, IoT, AND IT ASSET MANAGEMENT**

**USAGE REPORTING AND ANALYSIS**

**AUTOMATED PROCUREMENT AND EBONDING**

**CENTRALIZED APPROVALS AND AUTOMATED COST ALLOCATION**

- ✓ **TELECOM EXPENSE MANAGEMENT**  
Manage the full telecom invoice lifecycle, automating the receipt through payment process while validating contracted rates
- ✓ **CLOUD AND IoT MANAGEMENT**  
Harness the power of newfound technologies like cloud and IoT and protect against misuse, zero use services, and abnormal usage.
- ✓ **INVENTORY AND EXPENSE AUDIT**  
Manage your telecom and technology inventory in a single database and establish baseline contracted rates for automated expense auditing
- ✓ **AUTOMATED COST ALLOCATION**  
Eliminate manual cost coding and let the platform handle custom cost center and general ledger allocations at summary or detail levels
- ✓ **CENTRALIZED EMAIL APPROVALS**  
Configurable email approval chains with variable approval levels ensure flexibility across all accounts and billing types
- ✓ **DISPUTE MANAGEMENT**  
Centralized management of vendor disputes through expense with unique dispute numbers and vendor communication tools
- ✓ **INVOICE PAYMENT SERVICES**  
Interface with your internal AP system or hand-off the payment duties to MDSL entirely and eliminate late fees to close the invoice lifecycle
- ✓ **CONTRACT MANAGEMENT**  
Manage a library of contracts, receive reminders for expiring agreements, and link individual rates to actual inventory

“ We also received \$850K in auditing refunds with additional refunds pending.”
